Figure 143B
Sequence alignment of the DNA sequence shown in Figure 143A with the reference sequence (GenBank accession number: U00006.2). The alignment shows a high degree of similarity between the two sequences, with only a few minor differences (indicated by asterisks) observed. The alignment is shown in the format of a dot plot, where the x-axis represents the reference sequence and the y-axis represents the sample sequence. The dots indicate positions where the sequences are identical, while the asterisks indicate positions where they differ.
